

NEW IL's REPORT

Directorate		IL Number		Priority #	Review Comments	Review Action Items
NAI	Pr gram Ted Scharlemann (sub for Arden)	9928	1		TS-Would like to go forward with this one. NN-20 is not currently funding this technology. We need to find out how they feel about us licensing this technology. VL-NN-20 is the sponsor. A publication went out to DOD for a conference. RM-it's patentable. Think it's a wonderful disclosure-solid and well thought out. We need to take some action soon because of a possible bar date. BW-We ought to write it.	TL-Check on sponsor's attitude towards licensing this technology and get back to Veronica. VL-Waive and file
M nth	Patents Richard Main	Anthony J. Ruggiero	Revisits June		AD-There are three companies interested in this. Think the sponsor wants to commercialize. No publications. Real close to reduction to practice. kb-Rights requested, though never granted. Linda Lerner will send 2nd request to DOE. BW-Checked with Daubenspeck and haven't heard back.	BW-Check with Daubenspeck if rights haven't been granted. Waive & File
N Interest by IPAC	IP&C Lanier, West, Weis	Integrated Optical Capillary Electrophoresis Chemical Microsensor	Provisional		VL-Evidently, DOE never did grant them. Mixup with paperwork. Resent paperwork and they will respond back. By the time we get ready to do Top 20, we should hear from DOE. Linda can give us an update. AD-Full prototype is to be complete within one year.
